Tonight's *Presenter*

Daniel Wilkie

T³ Regional Instructor

Pelzer, SC

Daniel has taught every level of high school math (including IB and AP) for 24 years in Texas, New York, Virginia, and now South Carolina. He is currently teaching Math at Christ Church Episcopal School in Greenville, South Carolina. Daniel has been married to his loving wife Amanda for 16 years. They have 3 awesome children: Cameron (10), Alex (7), and Kevin (4). Other than loving his family, Daniel enjoys educating teachers on all things TI and acting in local theater productions.

The IB® Mathematical Exploration, or Internal Assessment, is an important opportunity for your students to earn points that can relieve the pressure of their final exam. But what sets a good Mathematical Exploration paper apart from the rest? The presenter will share the makings of a strong Mathematical Exploration and what role Texas Instruments (TI) technology can play in it.

TI products have been developed independently from and are not endorsed by the International Baccalaureate Organization. IB is a registered trademark owned by the International Baccalaureate Organization. Policies subject to change. Visit www.ibo.org.

In this webinar the presenter will share:

- The guidelines and rubric for a Math Exploration
- Expectations for the Math Exploration and how technology fits into them
- Samples of good and not-so-good Math Exploration papers with and without TI technology

Presenter: Daniel Wilkie
